About Me

Motivated and detail-oriented professional with a strong background in Angular UI development. Solid understanding of web technologies and front-end development concepts. Proven ability to deliver high-quality code and collaborate effectively within cross-functional teams. Excellent problem-solving skills and a strong commitment to continuous learning and professional growth.

Professional Experience

Calsoft
01/2022 – Present

Key responsibilities:

- Developed and maintained user interfaces using Angular, HTML5, CSS3, and TypeScript.
- Collaborated with the back-end development team to integrate UI components with server-side logic.
- Participated in the entire software development lifecycle, including requirement gathering, design, development, testing, and deployment.
- Optimized application performance through code refactoring and implementing best practices.
- Conducted code reviews to ensure adherence to coding standards and best practices.
- Worked closely with UX designers to create intuitive and visually appealing user interfaces.
- Collaborated with cross-functional teams, including product managers, QA engineers, and stakeholders, to deliver high-quality software solutions.
- Assisted in troubleshooting and resolving UI-related issues reported by end-users.

Projects

Project: Cisco HyperFlex HTML plugin for VMWare vCenter
My Responsibilities includes:

- Development of component in Angular. Writing new and fixing existing validations. Development of Login page and Registration page, consuming JWT token, authenticating user, manage session . Development of Unit tests and fixing existing unit tests.And many more....

Project : UCSM
My Responsibilities includes:

- Working on transforming VMware VCenter local plugin to a remote plugin which was developed using Angular. It involved transformation as per new architecture. Used VMWare Clarity framework as a fronend framework.And many more...
